

PharmAbs e-News October 2010

This e-News highlights our new developments and upcoming events. We hope you will find items in it of interest.

PharmAbs mouse monoclonal antibody production service

A new reference in tailor-made mAb production

- Custom mAbs guaranteed in ELISA, Western Blot, Immunoprecipitation, Immunohistochemistry, FACS, Biological assays, ...
- Highly flexible and interactive:
 - You identify the clones of interest after being able to test all ELISA-positive hybridoma supernatants in your own laboratory. This ensures that we clone only those antibodies that suit your purpose.
 - You control every stage of the process and decide how to move on to the next phase.
- Selected clones and purified mAbs are delivered.
- Already starting from 4944 €.

What does it take to get started?

- It's easy! Tell us about your project and we will provide you with a full quotation & service offer.
- Full confidentiality is guaranteed
- **Learn more @ www.pharmabs.org**

PharmAbs technologies to offer in collaborative R&D projects

- Tailor-made monoclonal antibody generation and customized antibody engineering (Fab and scFv fragments, bispecific antibodies)
- Bio-molecular modeling (humanisation of murine mAbs, de-immunisation of mAbs)
- Immuno assay development
- Development of neutralizing human monoclonal antibodies originating from immune cells obtained from selected infected individuals

Upcoming event: *Antibody Research Meeting 2011*

This meeting will be a **meeting place** for academic researchers, medical doctors, industry leaders and PharmAbs researchers. Outstanding speakers from industry and academia will give their view on strategies and challenges for the next generation of antibodies and related products. The meeting is programmed to be held in Leuven (Belgium) in the early spring of 2011. More details about the final date, meeting program and venue will follow.
